

PROJECT NAME: Equipment for Microscopy Facility

RECIPIENT: Utah Valley University

LOCATION: Orem, Utah

PURPOSE: UVU is designing its new science laboratory building, which includes space for a comprehensive microscopy facility. Funding would be used for equipment and instrumentation to ensure the facility is fully operational and would allow for expansion of research capabilities and the necessary resources for teaching the latest microscopy-imaging techniques to students. Providing this educational experience will help students become highly competitive when they seek employment in the fields of biomedicine and research and development.

AMOUNT: \$1,606,500
